### NetEffect 10GB iWARP Ethernet Channel Adapters Attract Attention of Resellers

**AUSTIN, TX** – May 15, 2006– NetEffect, driving the next generation of Ethernet connectivity solutions throughout the datacenter, today announced that Abba Technologies will serve as a reseller and systems integrator offering the company's family of 10Gb iWARP Ethernet Channel Adapters (ECAs). Abba Technologies is adding NetEffect products to their portfolio in an effort to provide customers with standards-based, multi-gigabit high-performance connectivity solutions.

NetEffect ECAs are the first on the market to fully implement the iWARP Ethernet standard, allowing data center managers to realize more than 10Gbps data throughput using existing Ethernet-based hardware and software. Earlier connectivity solutions relied on expensive, proprietary technologies to achieve such throughput.

"We are pleased by the growing support for NetEffect shown by the community of IT solutions providers," said Rick Maule, CEO of NetEffect. "These professionals evaluate competing technologies every day. The fact that they've selected NetEffect for their customer base is a testament to the unique benefits only found in our product family."

Abba Technologies is located in Albuquerque, New Mexico, and will serve the mountain states. They will concentrate on sales and marketing of NetEffect solutions to the national laboratories and universities, where data throughput and low latency is critical.

"Our customers look to us for the technology solutions they can bet their business operations on," said Andrew L. Baca, CEO and President of Abba Technologies. "We're impressed by the outstanding performance, of the NetEffect solution and are confident our customers will be too."

NetEffect will continue to partner with qualified resellers and systems integrators throughout the US to ensure national coverage.

### About Abba Technologies

Abba Technologies, Inc. is an IT Solutions and Professional Services provider. Abba addresses the entire IT Infrastructure and solves real business issues. Their core competencies include IT Consolidation, IT Virtualization, Network Infrastructures, and IT Security. Abba's focus is on enterprise-class and high performance computing, networking, and storage solutions for businesses, educational institutions, and all government agencies. Visit www.abbatech.com
