Bandspeed's AirMaestro Access Point Platform is Featured Solution at Interop Tokyo 2006

AUSTIN, TX – June 29, 2006 – After the debut of its AirMaestro Wi-Fi access point (AP) platform, Bandspeed, the leader in Wi-Fi management platforms for the business mass market, conducted over 100 demonstrations of AirMaestro in the Planex booth at Interop Tokyo 2006. Bandspeed held more than 30 demonstrations per day for three days at the heavily attended conference, which hosted over 160,000 attendees and over 300 exhibitors. As an added highlight, Bandspeed's rogue AP detection solution was listed as "one of the things to see" in the show dailies.

"This is a very exciting time for Bandspeed. The AirMaestro launch was very well-received by the industry, and Interop Tokyo 2006 was an overwhelming success as we received significant interest from attendees who saw our demonstrations," said Bill Eversole, president and CEO, Bandspeed. "Our main focus now is to continue to work with our partners and OEM customers to quickly roll out solutions based on the AirMaestro platform."

Press and analysts who would like more information, or to schedule an interview with Bandspeed should contact Catherine Seeds at cseeds@ketnerbarnes.com or 512-794-8876.
